SKILLS

- Linux
- C
- C++
- Git

PROFESSIONAL EXPERIENCE

Backoffice

Vortex Telecomunicações 2018-2021

During my journey at the company I worked in several sectors, such as contract scanning, telephone plan auditing, activation and scheduling of fiber optic installation and finally I managed a team that took care of paying customer invoices.

I used a lot of systems like Siebel and CRM to carry out the company's activities and especially Excel to have good control of our databases.

UI Designer

Yourb - NOV 2021- FEV 2022

I was responsible for helping to create the new screens for updating the mobile application, using Figma. I was also responsible for creating artwork for the company's social networks.

EDUCATION

42 Lisbon

Common Core - OUT 2023

Within 42 I am currently working on a project that would be a 3D game using C, the common core and a series of projects using C, C++ and Linux.
